

ENVIRONMENTAL AND PRODUCT SAFETY DATA SHEET

Product

Cup Dispenser

Raw Material

PS, Steel spring

Packaging

Inner: Corrugated Cardboard

Outer: Corrugated Cardboard

Field Of Application

The Cup dispenser is intended to be used together with Duni plastic cups.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC.

For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects

Product

PS is manufactured from mineral oil or natural gas. The polymer consists simply of carbon and hydrogen.

Packaging

Polystyrene (PS) is made by refining of mineral oil or natural gas. The polymer consists simply of carbon and hydrogen.

The corrugated board is unbleached and to a large extent made from recycled fibres. The printing ink is water based.

Product Safety

- Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented the environmental management system ISO 14001.

Management Of Used Products

Energy Recovery

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Recycling

Recycling of the plastic and the corrugated board is possible for producing new products. Check with the local recycling company.

Validity

This is a copy of a document issued 2021-06-15. It is normally updated every second year or when there is a change in the manufacturing process, in the product or in legislation. To make sure that you have the latest edition, contact Duni AB.
