the Vac Q™

Sage's new Vac Q™ accessory is an anti-oxidation vacuum attachment for your blender. The Vac Q™ accessory draws out air from your blender jug for extra smooth blending. Less air in your mix means smoother textures, brighter colours and richer flavours.

Sage's Fresh & Furious™ blender is vacuum compatible and can be used with the Vac Q™ accessory.

However, in order to vacuum-blend, you will need to request the updated Vacuum Blend Lid through Sage's Consumer Support.
