

# Armrest

The Mousetrapper armrest was designed with the user in mind. Whether you use it in combination with a Mousetrapper or not, it helps to relieve strain in your neck, shoulders, backs and forearms. The asymmetrical design promotes a naturally centred and relaxed working position in front of your Mousetrapper or keyboard. This prevents the risks of carpal tunnel syndrome and strain injuries.

## Benefits of armrest

Thanks to the uniquely thin central section, which is only 1,6 inches deep, it encourages you to work very close to the keyboard, which prevents over-stretching your forearms. The Mousetrapper armrest is easy to clean and disinfect, since the top surface is made from black artificial leather.

The Mousetrapper armrest comes with a set of two Z-shaped brackets as standard, which will fit most desks on the market. The desktop should not be thicker than 1,6 inches.

## Facts

- » Width: 26,7 inches
- » Depth: 8 inches
- » Height: 0,8 inches
- » Waist: 1,6 inches
- » Weight: 49,4 oz
- » Product code: TB215
