Setting up a Speedi Meal

Your guide to easy, complete meals all in one pot in under 30 minutes.

Cook & Crisp tray layer

PROTEIN

The purpose of this layer is for it to sit half way up the pot closer to the heating element so that the proteins or vegetables can be crisped. It then leaves space below for other ingredients to be added.

Place the Cook & Crisp tray in the top position to create the perfect air flow.

Bottom layer

GRAINS & PASTA

Choose from a variety of grains or pasta. Place these in the bottom of the pot before adding the Cook & Crisp layer. The tray will shield the ingredients so that they cook but do not turn crispy.

1. Add the grain or pasta

Start by measuring in your grain or pasta and add to the bottom of the pot.

2. Add liquid

Now that your ingredients are in the bottom of the pot, add water, stock or sauce and stir until combined.

Optional: Add vegetables if desired. See next page for ideal quantities for best results.

3. Prep and season protein

Prepare your desired protein, then place protein on the Cook & Crisp tray in the top position and close the lid.

4. Cook

Flip the SmartSwitch to the left for RAPID COOKER mode and select SPEEDI MEALS. Set temp and time based on protein.

Tip: When cooking is complete, remove protein and/or vegetables from the Cook & Crisp tray. Then use silicone tipped tongs to grab the centre handle and remove the tray from the unit.

BUILD YOUR OWN *Speedi Meal*

Makes 3-4 servings:

To reduce servings for 1-2 people, halve the base, veggies and protein quantities and follow temperature and time recommendations as listed. Then cover Cook & Crisp tray with aluminium foil to protect base from additional heat. For more information on building your meal and unit interaction, see page 6.

Tip: If base needs more time, switch to SEAR/SAUTÉ and cook with the lid open until liquid is absorbed. Ensure pasta is covered by water or sauce. If not, add 60ml additional cold water or sauce. When using frozen veggies, remove 125ml liquid from base for fluffier rice.

Note: For tender results, add veggies to the base. For crispier results, add hearty veggies (carrots, sweet potato, Brussels sprouts) to the tray at the start of cooking and delicate veggies (broccoli, cauliflower, green beans) to the tray during the last 5-7 mins of cooking.

Tip: For best results follow recommended heights and weights
Tip: Portobello mushrooms, thick cauliflower, celariac, kohlrabi slices, can be substituted instead of protein. 180°C for 8-15 minutes.

Tip: Marinate proteins up to 6 hours ahead of time with favourite marinade or buy pre-marinated meats to save time.

Tip: For thicker cuts of meat, add 3-5 minutes to cook time. Note that this may overcook grains. We recommend sticking to suggested height and weight of proteins.
NOTE: These temps and times are for WELL DONE outputs. Check food.

For best results, shake, toss or flip often.

We recommend frequently checking your food and shaking, tossing or flipping it to ensure desired results.

Use these cook times as a guide, adjusting to your preference.

Shake/toss food or flip with silicone-tipped tongs

Remove food immediately after cook time is complete and your desired level of outcome is achieved. We recommend using an instant-read thermometer to monitor the internal temperature of proteins.
