

i3CONNECT AllSync receiver

WIRELESS PRESENTING IN ONE CLICK

Share your screen instantly without any installation.
Connect the i3CONNECT AllSync Touch Transmitter
to your device and press the button to start sharing.

ADD SHARING TO ALL SCREENS

The AllSync Receiver adds wireless screen sharing to every screen, touch or non-touch. It simply connects via HDMI (and optional USB for touchback) to your screen. Minimal set up needed.

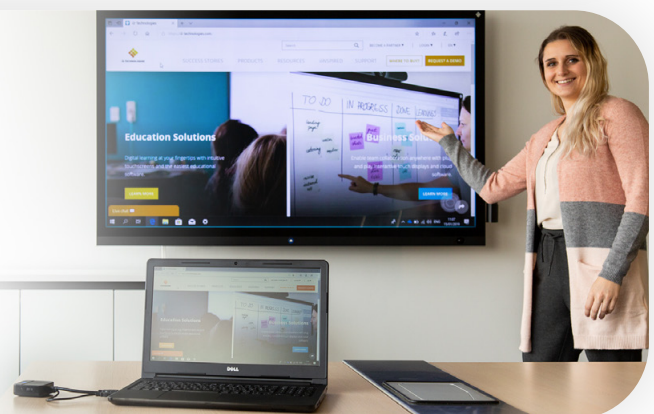

USE NATIVE SHARING

The AllSync Receiver works with all the major, native sharing protocols: Miracast for Windows, Google Cast for Android and Chromium, AirPlay for Apple devices. This means that you do not need any hard- or software on your sharing device to share.

USE WITH ALLSYNC DONGLE OR APP

In case you would rather use a dongle or a dedicated app: The AllSync Receiver works also with the AllSync USB-C transmitter dongle and the AllSync transmitter apps for Windows and MacOS.

TRUE INTERACTION WITH TOUCHBACK

Because we truly believe in interactivity, the AllSync Receiver supports real-time touchback with touchscreens. We support all touchscreens and all brands with HDMI input and USB touch out.

PRODUCT SPECIFICATIONS

Model name	AllSync Receiver 2.0
Product number	10010750
