

Rack-Mammut® Alarm Height Barrier

Technical data sheet

The Alarm Height Barrier provides effective protection against collision damage at ceiling height. Its easy installation allows for versatile use on door frames, loading docks, sprinkler systems, ventilation systems, and more. An acoustic and

visual alarm, triggered upon contact with vehicles, ensures immediate driver attention.

Protection at ceiling height

PRODUCT SPECIFICATIONS

Produktmerkmale	High-performance, durable special plastic absorbs any impact energy and returns to its original shape. It offers extremely low maintenance and repair cost savings on barriers, racking systems, and industrial trucks.	
Material	Polyolefin, UV-resistant, fire class HB, non-conductive, impermeable to most chemical products.	
Farbe	Yellow / Black	
Bodenplatte	Steel Black lacquered	INOX (RVS 304) No paint/coating

FIXING

Suspension	2 x 4 m PVC-coated steel wire Ø 1.8 mm wire Ø 3.2 mm, including carabiner	
------------	---	--

DIMENSIONS

Length	2000 mm
Ø	Ø140 mm
Alarm	15 Sek. /108 dB
Light signal	15 Sek.
