Configuration	Two-sided

The TRUST bike rest system offers maximum comfort and ample security against damage and theft. The freely mountable leaning bars made of corrosion-resistant 48 mm galvanised tubular steel make it easy to park bikes of all types. Leaned bicycles can be securely attached to their bicycle frame using the integrated steel eyelets. TRUST stanchions enable you to realise your own

individual bicycle parking facility in no time and easily expand or remove the stanchions at any time. Whether embedded in concrete or bolted to the ground; in any case, the speedy and inexpensive delivery by parcel service in recyclable packaging is an additional convincing argument.

- + Sturdy tubular steel construction, galvanised
- + For every size and type of bike
- + Optimised anti-theft protection through steel eyelets
- + For setting in concrete or bolting down
- + Speedy, economical shipping via parcel service
