Specification

Weight: 280 kg

Gross weight: 285 kg

Width: 1410 mm

Height: 1260 mm

Length: 2145 mm

Volume: 2000 l

Material: Sheet steel

Color: Blue

Load capacity: 1500 kg

Product information

Stable tilt container for effective material handling and waste sorting. Ideal for holding packaging, metal and wood waste. Manufactured from 3 mm thick, fully welded steel plate. The surface is powder coated (blue RAL 5005) for a sustainable, hard-wearing finish. C/c fork holes 730 mm and fork holes 225x95 mm.

The tilt container is suitable for use with a forklift truck. To tip the skip, the sprung pressure plate on the front of the chassis is driven against an edge and pushed in. It can also be tipped manually by using the handle on the side. For best results when emptying, it should be evenly loaded and full.

The tilt container is CE marked and classified for load capacity. Can be supplemented with accessories such as a lid, wheels and decals for optimised use.
